PT 585•H™

THE PLAYER'S UTILITY METAL

The new 585•H utility metals blend the best playing characteristics of fairway metals and long irons to provide greater versatility and shot making options from the tee, fairway and rough. Developed with input from Tour professionals, the new 585•H offers fairway metal-type launch with a flatter ball flight for iron-like control.

Lucas Glover

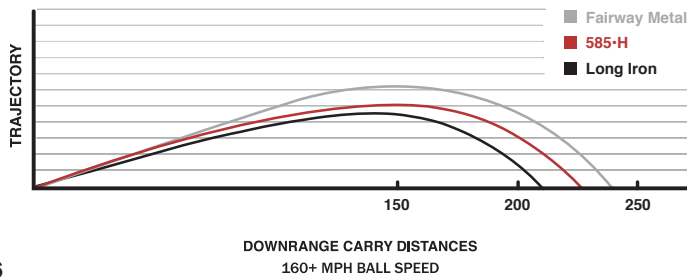

Sleek, Compact Teardrop Shape with a perfectly square face angle provides a confidence-inspiring appearance.

Non-Offset Design produces the ideal ball flight with a controllable apex for accuracy and shot control.

Trajectory and Shot Control preferred by better players for greater accuracy. A wider sole with a deep CG promotes a higher initial launch and greater distance than a comparable long iron. The non-offset hosel produces a straight flight with a lower peak trajectory than traditional fairway metals for superior control. Four different loft specifications allow for precise long-game gap fitting.

585.H Loft	17°	19°	21°	24°
More Versatile Than:	2 Iron/ 4 Wood	5 Wood	3 Iron	4 Iron

Multi-Material Construction with a softer 431 stainless steel body provides a sweet, solid feel while a large 455 stainless steel face insert creates maximum ball speed over the entire face area.

20g Tungsten Weight in the sole pushes the CG low and deep for fairway metal-type launch and distance with greater control.

Modified Bore-Thru removes weight from the heel to optimize the CG location in the center of the club face for maximum energy transfer. A polymer Neutralizer™ pin dampens vibration for outstanding sound and feel.

Wide, Shallow Face offers a larger hitting area than comparable long irons for greater playability and confidence.

Contoured Sole with heel and toe relief minimizes ground resistance and promotes crisp, solid contact from all types of lies.

585•H Specifications

	RH/LH Lofts	Lie	Length (steel)	Length (graphite)
585.H	17°	58°	40"	40.5"
585.H	19°	58°	40"	40.5"
585.H	21°	58.5°	39.5"	40"
