

Titleist

755™

LOOKS. FEEL. FORGIVENESS.

The new Forged 755 irons integrate contemporary design elements into the Tour-proven, Titleist® 700 series platform for greater performance and improved playability. Crafted from 410 stainless steel, the new Forged 755 irons deliver the aesthetics, feel and shot-making capabilities serious players demand.

Ben Crane

Thin Face Design creates a larger volume cavity and allows weight to be repositioned lower, to the perimeter for increased forgiveness and playability.

Enhanced Heel-Toe Weighting redistributes 10 grams of weight from the face for a higher moment of inertia and greater clubhead stability.

Vibration Dampening Chip reinforces the thin face and significantly reduces vibration for greater feedback while improving sound and feel.

High-Performance Sole with a rolled leading edge prevents digging in soft conditions. Progressive bounce angles reduce skipping in firmer conditions for crisp, consistent contact.

Optimized CG Position offers easy initial launch with a controllable ball flight.

Dual Hosel Lengths relocate weight lower in the 2-7 irons for easier initial launch while longer hosels in the 8-P raise the CG slightly for superior knock-down control.

Soft, Forged Feel of 410 stainless steel with a non-glare satin finish creates the soft feel and sound preferred by better golfers and allows for a wider range of custom options.

Progressive Appearance of the topline, offset, sole width and blade length provides continuity through the set for a seamless transition from playable long irons to more traditional short irons.
