

THE FITTINGWORKS TOUR VAN EXPERIENCE

Titleist®

• BETTER FIT. BETTER GAME.

The mobile Titleist FittingWorks Tour Vans combine comprehensive high level fittings with on-site club building to provide a tour level fitting experience. Our expert fitters are equipped with launch monitors and an expansive range of fitting clubs. The tour van technicians provide assembly, personalization and repair services.

• DRIVER FITTING

The goal of a Titleist Driver Fitting is to maximize distance and accuracy by selecting a driver that helps the player achieve ideal launch conditions. The driver fitting will test and analyze a player's launch conditions and recommend the proper Titleist driver model, loft, lie angle, shaft, shaft flex, shaft length and SFT (SureFit Tour) hosel setting for the player.

• LONG GAME FITTING

More than a simple fairway metal fitting, the Titleist Long Game Fitting optimizes the 3-wood, establishes the most playable long iron, and provides key knowledge of carry distances, trajectory and ball stopping ability required to attack par-5s in two, long par-4s and difficult par-3s for lower scores. In addition, the long game fitting will improve a player's course management skills by providing better knowledge and understanding of proper club selection.

• IRON FITTING

The goal of a Titleist Iron Fitting is to provide the player with the best Titleist iron model and custom club specifications to increase performance through accuracy, shot making ability and distance control. The iron fitting will test the player's iron launch conditions to identify the best model and then dynamically fit length, lie angle, shaft type, shaft flex, grip type and grip size custom specifications.

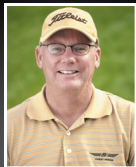

• WEDGE FITTING

The goal of a Titleist Wedge Fitting is to provide the best combination of Vokey Design wedges to optimize a player's short game performance and better control yardage gaps. The wedge fitting will match loft, bounce, sole design, and club face spin characteristics with a player's swing technique. Consistent yardage gaps combined with optimal control and spin allow players to better capitalize on scoring opportunities with their wedges.

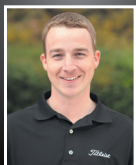

FITTINGWORKS TOUR

• GLENN MAHLER

Glenn Mahler is an extremely talented fitter and PGA Member who has been with the FittingWorks Tour Van program for over five years. His extensive knowledge and experience have helped many serious golfers play better and shoot lower scores.

• BRAD CLOKE

Brad Cloke held previous positions as a Customer Service Rep and local fitting consultant to Titleist in Chicago while gaining his PGA of America membership. Brad is a skilled club builder and is extremely knowledgeable about how equipment affects performance.

• ERIK BROWN

Erik Brown is a PGA Member and joined Titleist in 1997. He has been actively involved with club fitting and fitting training for more than 15 years. Erik brings his in-depth knowledge and extensive experience to the FittingWorks Tour Van to help golfers perform better with properly fit equipment.

• PETER BEZUK

Peter Bezuk has worked on the FittingWorks Tour Van since joining the company two years ago. He is a graduate of the San Diego Golf Academy and is a highly skilled club builder who takes great pride in helping golfers play better with precision-crafted clubs.
